Re: Completion of East Palm Canyon Pavement Rehabilitation and Overlay Project

Dear Business or Property Owner/Resident,

The final grinding of a small section of East Palm Canyon, between Cathedral Canyon Drive and Bankside, on the east bound lanes has been scheduled for January 17th. The rubberized asphalt pavement is scheduled to be placed on Saturday January 18th. The work may require about four (4) hours to complete.

I apologize for any inconveniences that this may cause you and your business.

In the meantime the highway is open and passable, and access to all businesses and side streets are open.

We apologize for the delay. If you have questions or comments, you may contact me at (760) 770-0360.

Sincerely,

William O. Bayne
